Don't miss this Event!

Join us for a fun and fact-filled Power Point show illustrated with stunning original photography by naturalist and Keeping Track's director, Susan Morse. Bring the children! There will be lots of opportunities for them to hear animal calls and maybe make a few themselves. Plan to learn about our wild neighbors, including whitetail deer, moose, bobcat, Canada lynx, black bear, river otter, mink, fisher, coyotes and the foxes. Other animals of interest to all of us include wolf, coyote and cougar, otherwise known as the catamount. Prior to the Point presentation there will be a full-day field workshop with Susan at Wolfrun, Jericho, Vermont. During this field outing you will discover and interpret wildlife sign and learn why wildlife depends on healthy, conserved habitat for successful survival.
